

Fall 2017

The Ontario Home Builders' Association and our Institute of Building Excellence is committed to providing professional development opportunities for the residential construction industry. With a focus on updating and development of new training programs, we continue to raise the level of professionalism and set a high standard for entry into this important economic sector. The most effective way this can be done is through a certification program, providing builders and renovators with something tangible they can use to promote their business and keep a competitive edge in today's economy.

***Courses approved by Tarion Warranty Corporation, these courses are required to obtain warranty coverage. Get ahead of the competition and start fulfilling your training requirements today! Visit www.learnyourliving.ca today to enrol in a course near you.**

Marketing and Project Sales

Learn about the importance of building an effective Sales and Marketing Strategy, from researching the market to opportunities to building a home to meet the exacting needs of the target buyer. All of which results in the final sale of the home to very satisfied customers that "sing the praises" of the builder/trades/developer/realtor.

Location: OHBA **Date: October 12, 2017**

Financial Management*

Most business owners are not trained professionally in accounting or finance; but given the uncertain nature of business and economic cycles combined with an increasingly rapid rate to technological change, monitoring the financial condition of a business and making sound financial decisions has never been more important.

Instructor: *Jean-Pierre Seguin*

Location: OHBA **Date: October 19, 2017**

Project Management and Site Supervision*

To help both novice and experienced superintendents improve their awareness and understanding of the primary elements of construction supervision that will result in improved performance and profitability for your building company. The course covers methods to get employees and sub-trades to work together to get the job done on time and on budget while meeting standards for quality and using new and innovative methods and materials. You will learn techniques that will help in planning and scheduling of complex projects, get people working as a team and keep your projects on the path to successful completion.
